Ukkö Robotics is looking for an experienced UI programmer to join its team of engineers and developers. Located in Winnipeg's exchange district Ukkö Robotics specializes in making fully connected autonomous barns. These machines care for animals in an ethical and environmentally friendly way - saving time, money, and pollution. Incorporated in 2016 Ukkö Robotics is a mature startup with stable funding for the next year. The number of employees is projected to grow to from 5 to 12 over the next year.

#### Roles and responsibilities:

- Design of UI elements from wireframe stage through to production.
- Implementation of design within React Native.
- Own the interaction from the user to the API call.

#### The Ideal candidate will:

- Have a love for design.
- Understand and be comfortable programming in React Native ( +redux ).
- Be a 'hacker' in the traditional sense.
- Have an opinion about their text editor, and is willing to defend it.

#### Work Environment:

- Small team.
- Relaxed atmosphere.
- Flexible physical space - industrial feel.

#### Technologies we like and use:

- React Native.
- AWS - ( IoT, API Gateway, Lambda, Dynamo, a few more.. )
- Node
- Slack
- Github

This position is not entry level. A college or university education and or equivalent experience is required. Compensation will be based on experience and education.

Please send a Resume/CV with a cover letter to [careers@ukkorobotics.com](mailto:careers@ukkorobotics.com) .
