JOB POSTING

POSITION: Technical Analyst – UNIX and SAN Admin

DEPARTMENT: Information Systems

LOCATION: Winnipeg, Manitoba

REPORTS TO: Supervisor, Technical Services

PRIMARY OBJECTIVE:

Under the direction of the Supervisor, Technical Services leads in the planning, design, installation, optimization and administration of our UNIX servers and SAN infrastructure.

PRIMARY RESPONSIBILITIES:

- Ensure the availability of our critical UNIX based systems by monitoring, identifying and proactively resolving potential problem areas, maintaining current patch levels, and ensuring backup and DR system integrity.
- Maintain up-to-date policies, standards and procedures in all primary areas, under the direction of the Technical Services Supervisor, where appropriate.
- Act as project lead in the design and review of new server systems, applications, and upgrades.
- Accept and/or identify business unit challenges, and obtain the solution through acquired knowledge, creativity, and available resources.
- Lead projects of small to medium sizes using project management methodologies.
- Shift work and occasional travel may be required.

POSITION REQUIREMENTS:

- Degree, Diploma or Certificate in one of the following: Computer Science, Mathematics, Electronics, or other science-related field.
- Minimum two years of experience with applied knowledge of UNIX, SAN and DR technologies.
- Technical knowledge of Sun Solaris, EMC SAN, Citrix, Windows 7/XP/2000, Lotus Domino/Notes, and LAN/WAN infrastructures would be a definite asset.
- Bilingual in French/English would be considered a strong asset.

If you or someone you know have the qualifications and are interested in this position, please submit a resume or job posting application (if internal candidate) to Barbara Stepic by January 22nd, 2010.

Staff are reminded of our Employee Referral Award Program for recommending successful external candidates for permanent positions.
